</table>

1 For foreign banks and banks with parents in CBS reporting countries, F plus Q does not sum to U because F is reported by a larger sample of banks; for the latest quarter, immediate counterparty data are reported by banks in 31 countries and guarantor basis data by banks in 26. For parents in individual CBS reporting countries, F plus Q may not sum to U because of rounding differences or inconsistencies in the underlying data reported by banks. Positions on the country where the controlling parent is located, ie on residents of banks’ home country. Available only for countries that are CBS reporting countries.
